## HORTICULTURAL REQUISITES

### Glazola (Glazing Cement)

A perfect compound for glazing, reglazing and repair work on greenhouses and sash. It is superior to putty, as it never gets hard or brittle. It will outlast putty three or four times—no loose or sliding glass to bother for many years. It contracts and expands with the greenhouses, thereby eliminating broken glass to a minimum. Its elasticity remains under atmospheric conditions regardless of how hot or cold the weather may be. Glazola is always ready for instant use and will not harden on your hands, and we sell it under a money-back guarantee. Its color is black, being made from long fibre asbestos and elastic gums. In glazing, three gallons will set one thousand feet of glass. We offer you this Glazola Cement at the following prices: Thirty-five and 55-gal. steel drums, \$1.50 per gal.; 5-gal. cans, \$1.70 per gal.; gal. can, \$1.75; 1 Glazing Gun gratis with each 35 or 55-gal. drum. Extra one-hand Glazing Guns, \$5.00 each.

**PULVERIZED SHEEP MANURE**

We believe we have the best brand of Pulverized Sheep Manure obtainable. It is strictly a pure animal product with the addition of no commercial fertilizer to bring it up to high chemical analysis. Our sheep manure is composed of cleanings from wool and contains a minimum amount of dirt and foreign matter which is so common in the ordinary stock yards products. It also has an oily quality not found in the ordinary sheep manure. This makes it much more pleasant to use, making it less dry and powdery.

Sheep Manure is used by all florists and growers both for indoor and outdoor use. We use it in our own greenhouses in large quantities for mixing with potting soil. For outdoor use it is very convenient, comparatively odorless and produces quicker and better results than stable manure without the unsightly appearance of the latter. Per 100 lbs., \$2.50; 500 lbs., \$12.00; 1,000 lbs., \$22.00; 1 ton, \$42.00.

**SPRAYERS****AUTO-SPRAY No. 1**

The Auto-Spray No. 1 is strongly built and guaranteed to be satisfactory and without defect. Will handle all solutions, including whitewash, and can be used in all kinds of work. All parts are instantly accessible and easily replaced. Equipped with 2 feet of  $\frac{1}{2}$ -inch hose, nozzle for fine spray, cap for solid stream and either stop-cock or our patented self-cleaning shut-off "auto-pop" is ordered.

**AUTO-SPRAY No. 26**

A continuous atomizer of unusual merit. The pressure generated on the down stroke of the plunger allows this sprayer to produce a continuous mist-like spray. This is a decided advantage over ordinary intermittent atomizers as spraying can be done more rapidly and with less exertion. The container can be detached for refilling and cleaned by simply unscrewing from the pump cylinder. By removing the container the siphon tube is easily and quickly cleaned. Two nozzles are supplied, one for straight and one for angular spraying.

## PEAT MOSS

### For Florists, Nurserymen and Gardeners

This is decomposed vegetable matter thoroughly dried, odorless, free from weeds and disease and granulated to convenient size. This material is well known in Europe, having been used for many years by successful growers, and has already found great favor in this country by the best growers, especially as more and more attention is being paid to the fact that productive soil requires large amounts of humus to replace that which is taken off in crops. Granulated Peat Moss furnishes humus in its purest form without the addition of disease spores and fungus which is found in all manure. It absorbs and retains ten times its weight of water, and the mixing of this material with potting soil and the addition of a little complete fertilizer will produce as good results as the very richest manure without the dangers from bacteria and disease. For mulching around evergreens, rhododendrons, shrubbery of all kinds, it is unexcelled. Packed in large bales about 21 x 40 inches, covering about 240 square feet, one inch deep, \$3.00 each; small bales for trial purposes, \$1.00 each.
